To Whom It May Concern

Dear Sir or Madam:

We have worked with Mr. James Fraley and Elite Radon Team on several HUD 221 D4 projects in the Southeastern United States. James and his firm are extremely knowledgeable of the potential for below grade soil gases and the various methods of how to properly mitigate. Per HUD MAP guidelines, a radon professional is contracted to perform the sub slab design, installation and post construction certification, usually directly with the Owner.

James' recommendations for soil gas mitigation throughout the design development phase through to completion have resulted in a seamless process for both the design professionals as well onsite with the contractors. James and his firm are professional and courteous and I would highly recommend.

Sincerely,

Fred T. Pucciano, AIA
