RE: Elite Radon Team, Inc.
Letter of Reference

To Whom It May Concern:

Elite Radon Team has designed and installed a vapor mitigation system for us in Florida. We were concerned about them being from out of state. They coordinated all material deliveries with onsite personnel, were onsite the day before their scope was to begin and finished their installation in less time than anticipated. This project was more challenging due to the 36” thick concrete slab. Elite was exceptionally accommodating when dealing with unforeseen conditions. They came in on-time and on-budget, without the need for change orders. It is this can-do attitude that will have them continue to be a part of our team here at iConstructors.

If I can be of further assistance, or should you wish to discuss any project experience in detail, please do not hesitate to contact me.

Sincerely,

Gregory J. Kelly
Project Manager
